WELDING JOURNAL INDEX

VOLUME 70 — 1991

PUBLISHED BY THE AMERICAN WELDING SOCIETY, P.O. BOX 351040, MIAMI, FL 33135

Part 1 — WELDING JOURNAL

SUBJECT INDEX

Abrasivejet Cutting System Takes on the Competition — 57 (Feb).
Abrasives Is the Difference between a Light Touch or Roughing It — M. Leach, 52 (Aug).
Advanced Joining Technology Meets Navy, Industry Needs — H. A. Kuhn and R. S. Green, 27 (Oct).
Advanced Materials Move into Hardfacing — D. M. Scruggs, 27 (Aug).
Air Pressure Often Overlooked in Resistance Welding — E. A. Green, 91 (June).
Alaskan Oil Flowing, Corrosion Vigilance Keeps — A. Cullison, 27 (May).
Aluminum Rail Transit Cars, Welding BART's — B. Keyser, 39 (Nov).
Aluminum Welding, Understanding — W. Tuttle, 43 (Feb).
Aluminum Yacht World, Builders Make Waves in — M. R. Johnsen, 51 (Oct).
Analyzing the Failure of an Exhaust Diffuser Assembly — K. Sampath and M. D. Chaudhari, 45 (Nov).
Anniversary Sculpture Reflects Company's Talents — 69 (Jan).
Are You Making the Most of Your Cut-Off Operation — J. Snee, 60 (Feb).
Armor Steel Weldments, Ballistic Qualification of — F. Ade, 53 (Sept).
As-Welded Notch Impact Toughness Test for Steel Weldments — C. Hahin, 47 (Feb).
Automakers to Sit Up and Take Notice, Blank Welding Forces — B. Irving, 39 (Sept).
Automation Payback with Spreadsheet Software, Calculate — K. Kuk and H. O. Neumann, Jr., 73 (Jan).
AWS Welding Show, Record Number of Exhibitors Paces — A. Cullison and B. Irving, 27 (July).

Ballistic Qualification of Armor Steel Weldments — F. Ade, 53 (Sept).
BART's Aluminum Rail Transit Cars, Welding — B. Keyser, 39 (Nov).
Blank Welding Forces Automakers to Sit Up and Take Notice — B. Irving, 39 (Sept).
Boiler Manufacturer Automates Tube-to-Tube Welding, 73 (Nov).
Broken Studs Removed by Welding — S. Elmer, 64 (Dec).
Builders Make Waves in Aluminum Yacht World — M. R. Johnsen, 51 (Oct).
BWR Plants Cure IGSCC with New Technologies — B. Irving, 47 (June).

Cadillac, Laser Beam Welding Is Ready to Go to Work at — C. A. Forbis-Parrott, 37 (July).
Calculate Automation Payback with Spreadsheet Software — K. Kuk and H. O. Neumann, Jr., 73 (Jan).
Cast-to-Cast Variability in Stainless Steel Mechanized GTA Welds — J. A. Lambert, 41 (May).
Challenge for the '90s: Welding Utility Scrubbers — B. Irving, 35 (May).
Chrome-Moly Steel Returns to American Shores, A Promising — B. Irving, 35 (Dec).
CIM in Shipbuilding, Experiences in — J. Gustafsson and M. Heinakari, 27 (Mar).
Cladding and Hardfacing, High-Power Lasers Gain Ground for — B. Irving, 37 (Aug).
Clean Welding Environment, Select the Right Equipment for a — T. J. Vidmar, 47 (Sept).
Collision Repair Industry, Gas Metal Arc Welding for the — F. Kjeld, 39 (Apr).
Comparison of Fatigue Strengths: Laser Beam vs. Resistance Spot Welds, A — P. -C. Wang and K. -M. Ewing, 43 (Oct).
Composites?, What's Being Done to Weld Metal-Matrix — B. Irving, 65 (June).
Computer Codes Improve Reliability — 69 (Apr).
Computer Programs for Welding Engineering, Summary of — H. B. Cary, 40 (Jan).
Computers for the Design of Welded Joints, Using — C. L. Tsai, 47 (Jan).
Conference Reflects Keen Interest in Microalloyed Steels — A. Cullison, 80 (May).
Control of Pinch Welding Uses Quantitative Feedback Theory — A. E. Bentley, 51 (June).
Controlling Weld Quality: It's One Tough Job — A. Cullison, B. Irving and M. R. Johnsen, 31 (June).
Copper Clinics Emphasize Basic Joining Skills — W. E. Coffey, 57 (Oct).
Copper-Nickel, Understanding GTA Welding of 90/10 — S. H. Gutierrez, 76 (May).
Corrosion of Microalloy Steel Weldments?, What's Behind the — R. D. Kane and J. P. Ribble, 56 (May).
Corrosion Vigilance Keeps Alaskan Oil Flowing — A. Cullison, 27 (May).
Cut-Off Operation, Are You Making the Most of Your — J. Snee, 60 (Feb).
Cutting Carbon Steel, Oxygen Plasma Process Increases Quality in — F. H. Sasse, 64 (Feb).

Ballistic Qualification of Armor Steel Weldments — F. Ade, 53 (Sept).
BART's Aluminum Rail Transit Cars, Welding — B. Keyser, 39 (Nov).
Blank Welding Forces Automakers to Sit Up and Take Notice — B. Irving, 39 (Sept).
Boiler Manufacturer Automates Tube-to-Tube Welding, 73 (Nov).
Broken Studs Removed by Welding — S. Elmer, 64 (Dec).
Builders Make Waves in Aluminum Yacht World — M. R. Johnsen, 51 (Oct).
BWR Plants Cure IGSCC with New Technologies — B. Irving, 47 (June).

Cadillac, Laser Beam Welding Is Ready to Go to Work at — C. A. Forbis-Parrott, 37 (July).
Calculate Automation Payback with Spreadsheet Software — K. Kuk and H. O. Neumann, Jr., 73 (Jan).
Cast-to-Cast Variability in Stainless Steel Mechanized GTA Welds — J. A. Lambert, 41 (May).
Challenge for the '90s: Welding Utility Scrubbers — B. Irving, 35 (May).
Chrome-Moly Steel Returns to American Shores, A Promising — B. Irving, 35 (Dec).
CIM in Shipbuilding, Experiences in — J. Gustafsson and M. Heinakari, 27 (Mar).
Cladding and Hardfacing, High-Power Lasers Gain Ground for — B. Irving, 37 (Aug).
Clean Welding Environment, Select the Right Equipment for a — T. J. Vidmar, 47 (Sept).
Collision Repair Industry, Gas Metal Arc Welding for the — F. Kjeld, 39 (Apr).
Comparison of Fatigue Strengths: Laser Beam vs. Resistance Spot Welds, A — P. -C. Wang and K. -M. Ewing, 43 (Oct).
Composites?, What's Being Done to Weld Metal-Matrix — B. Irving, 65 (June).
Computer Codes Improve Reliability — 69 (Apr).
Computer Programs for Welding Engineering, Summary of — H. B. Cary, 40 (Jan).
Computers for the Design of Welded Joints, Using — C. L. Tsai, 47 (Jan).
Conference Reflects Keen Interest in Microalloyed Steels — A. Cullison, 80 (May).
Control of Pinch Welding Uses Quantitative Feedback Theory — A. E. Bentley, 51 (June).
Controlling Weld Quality: It's One Tough Job — A. Cullison, B. Irving and M. R. Johnsen, 31 (June).
Copper Clinics Emphasize Basic Joining Skills — W. E. Coffey, 57 (Oct).
Copper-Nickel, Understanding GTA Welding of 90/10 — S. H. Gutierrez, 76 (May).
Corrosion of Microalloy Steel Weldments?, What's Behind the — R. D. Kane and J. P. Ribble, 56 (May).
Corrosion Vigilance Keeps Alaskan Oil Flowing — A. Cullison, 27 (May).
Cut-Off Operation, Are You Making the Most of Your — J. Snee, 60 (Feb).
Cutting Carbon Steel, Oxygen Plasma Process Increases Quality in — F. H. Sasse, 64 (Feb).

Cutting Machine Blends International Technology, New — 63 (Feb).
Cutting PVC-Coated Steel, Take Precautions When — 55 (Feb).
Cutting Software Speeds Production — 58 (Feb).
Cutting System Takes on the Competition , Abrasivejet — 57 (Feb).

Defects in Mechanized GMA Field-Welded Pipelines, Girth Weld — M. J. Wagner and B. M. Patchett, 75 (June).
Design of Welded Joints, Using Computers for the — C. L. Tsai, 47 (Jan).
Diagnostic Device Quantifies, Defines Characteristics of Electron Beams — G. R. LaFlamme and D. E. Powers, 33 (Oct).
Distortion in Welded Structures, Recent Research Activities at MIT on Residual Stresses and — K. Masubuchi, 41 (Dec).
Drilling Produces Clean Holes in a Single Pulse, Electron Beam — C. Hsu, G. Lawrence and J. D. Ferrario, 49 (July).

Eastern Europe, Welding Technology in — T. A. Siewert and J. M. Gerken, 49 (Mar).
Electron Beam Drilling Produces Clean Holes in a Single Pulse — C. Hsu, G. Lawrence and J. D. Ferrario, 49 (July).
Electron Beam Welding, Soviet Style: A Front Runner for Space — B. Irving, 55 (July).
Electron Beams, Diagnostic Device Quantifies, Defines Characteristics of — G. R. LaFlamme and D. E. Powers, 33 (Oct).
Electronic Components, How $1-Billion Per Year Can Be Saved in the Soldering of — B. Irving, 54 (Oct).
Eliminate Fume Problems at the Source — 69 (Sept).
Evaluation of TIME Welding of HY80 Plate, An — J. R. Matthews, J. F. Porter, J. Church and M. Macecek, 35 (Feb).
Even in Its Infancy, Welding Provided the Solution — 88 (June).
Evolution of Underwater Cutting Paces Topside Technology — T. Joos, 63 (Apr).
Exhaust Diffuser Assembly, Analyzing the Failure of an — K. Sampath and M. D. Chaudhari, 45 (Nov).
Exhaust Pipe System Components, Plasma Arc Welding of — E. P. Vilkas, 49 (Apr).
Experiences with CIM in Shipbuilding — J. Gustafsson and M. Heinakari, 27 (Mar).
Expert Systems and their Applications to Welding, C-Based — D. M. Barborak, D. W. Dickinson and R. B. Madigan, 29 (Jan).

Failure of an Exhaust Diffuser Assembly — K. Sampath and M. D. Chaudhari, 45 (Nov).
Failure of a Locomotive Axle — A Metallographic Investigation — A. N. Sinha, B. N. Halder and O. N. Mohanty, 59 (Apr).
Fatigue Strengths: Laser Beam vs. Resistance Spot Welds, A Comparison of — P. -C. Wang and K. -M. Ewing, 43 (Oct).
Field Fabrication, Low-Pressure Waterjet Cutting Finds Its Niche in — B. Irving, 53 (Nov).
Flashless DC Welding of Rims Offers Advantages — F. C. Kucklick, 61 (July).
Floor Panel Production, System Elevates High-Rise — 67 (July).
Fume Problems at the Source, Eliminate — 69 (Sept).
Future of Metals, The — T. W. Eagar, 69 (June).

Gas Flow Rate Where It Counts, Invention Checks — J. Ely, 58 (Oct).
Gas Metal Arc Welding for the Collision Repair Industry — F. Kjeld, 39 (Apr).
Gas Tungsten Arc Welding: It's Built to Handle Titanium — 31 (Nov).
Girth Weld Defects in Mechanized GMA Field-Welded Pipelines — M. J. Wagner and B. M. Patchett, 75 (June).
GMA Field-Welded Pipelines, Girth Weld Defects in Mechanized — M. J. Wagner and B. M. Patchett, 75 (June).
GMA Welding, Real-Time Weld Quality Monitor Controls — R. Reilly, 36 (Mar).
GTA Welders Put the Finishing Touches on the Fins for the Patriot Missile — B. Irving, 71 (May).
GTA Welding: Behind the Scenes at Indy — 69 (Nov).
GTA Welding Replaces Nickel Convection Tubes, Orbital — B. K. Henon, 59 (Nov).
GTA Welds, Cast-to-Cast Variability in Stainless Steel Mechanized — J. A. Lambert, 41 (May).
GTA Welding of 90/10 Copper-Nickel, Understanding — S. H. Gutierrez, 76 (May).

Hardfacing, Advanced Materials Move into — D. M. Scruggs, 27 (Aug).
Hardfacing, High-Power Lasers Gain Ground for Cladding and — B. Irving, 37 (Aug).
High-Power Lasers Gain Ground for Cladding and Hardfacing — B. Irving, 37 (Aug).
High-Purity Piping Needs Contaminant-Free Welds — 63 (Nov).
High-Strength Steels, U. S. Steelmakers Plan More Weldable — B. Irving, 55 (Apr).
Hot Water Tanks, Lasers Heat Up the Production of — 61 (Sept).
How $1-Billion per Year Can Be Saved in the Soldering of Electronic Components — B. Irving, 54 (Oct).
HY80 Plate, An Evaluation of TIME Welding of — J. R. Matthews, J. F. Porter, J. Church and M. Macecek, 35 (Feb).

IGSCC with New Technologies, BWR Plants Cure — B. Irving, 47 (June).
Indy, GTA Welding: Behind the Scenes at — 69 (Nov).
Infrared Thermography Monitors Quality of Critical Welded Components — 59 (Dec).
Inspection, Radioscopy Offers Flexibility, Speed in Weld — F. J. Schlieper and M. Green, 61 (Mar).
Inspection Saves Money, Improves Quality, Ultrasonic Weld Flash — 71 (Mar).
International Technology, New Cutting Machine Blends — 63 (Feb).

Invention Checks Gas Flow Rate Where It Counts — J. Ely, 58 (Oct).
Joining Technology Meets Navy, Industry Needs, Advanced — H. A. Kuhn and R. S. Green, 27 (Oct).
Joint Design for Ultrasonic Welding of Thermoplastics, Selecting the Best — 67 (May).
Jumbo-Section Trusses Need Heavyweight Welding — B. A. D'Silva, 75 (Apr).

Knowing Abrasives Is the Difference between a Light Touch or Roughing It — M. Leach, 52 (Aug).

Laser Beam vs. Resistance Spot Welds, A Comparison of Fatigue Strengths: — P. -C. Wang and K. -M. Ewing, 43 (Oct).

Laser Beam Welding Is Ready to Go to Work at Cadillac — C. A. Forbis-Parrott, 37 (July).
Laser Company in Detroit, Ohio State Alumni Form the Core of a Specialized — B. Irving, 55 (Dec).
Lasers Gain Ground for Cladding and Hardfacing, High-Power — 34 (Aug).
Lasers Heat Up the Production of Hot Water Tanks — 61 (Sept).
Locomotive Axle — A Metallographic Investigation, Failure of a — A. N. Sinha, B. N. Halder and O. N. Mohanty, 59 (Apr).
Low Pressure Waterjet Cutting Finds Its Niche in Field Fabrication — B. Irving, 53 (Nov).

Malcolm Baldrige Award, Weld Quality Helps Cadillac Win the — B. Irving, 57 (Mar).
Metal-Matrix Composite?, What's Being Done to Weld — B. Irving, 65 (June).
Metal Spraying, Wire Arc Plasma: A New Contender in — D. R. Marantz and K. A. Kowals, 46 (Aug).
Metallographic Investigation, Failure of a Locomotive Axle — A. Sinha, B. N. Halder and O. N. Mohanty, 59 (Apr).
Metals, The Future of — T. W. Eagar, 69 (June).
Microalloy Steel Weldments?, What's Behind the Corrosion of — R. D. Kane and J. P. Ribble, 56 (May).
Microalloyed Steels, Conference Reflects Keen Interest in — A. Cullison, 80 (May).
Microwelding, Repairing Tungsten Filaments through — E. Zumelzu and L. Buchner, 65 (July).
Military Standard 248 Made Easy, Weld Qualification with — E. P. Weber, 29 (Feb).
Multiple Torch Selector Expands Equipment Versatility — C. Srba, 65 (Nov).
Myths Put to Rest, Welding — J. W. Western, 75 (Mar).

New Cutting Machine Blends International Technology — 63 (Feb).
Nickel Convection Tubes, Orbital GTA Welding Replaces — B. K. Henon, 59 (Nov).
Nondestructive Evaluation, Welding Problems for — D. W. Morgan, 30 (Aug).
Notch Impact Toughness Test for Steel Weldments, As-Welded — C. Hahin, 47 (Feb).

Oasis in the Desert, Welding Helps Make an — H. Abernathy, 66 (Dec).
Ohio State Alumni Form the Core of a Specialized Laser Company in Detroit — B. Irving, 55 (Dec).
Orbital GTA Welding Replaces Nickel Convection Tubes — B. K. Henon, 59 (Nov).
Oxygen Plasma Process Increases Quality in Cutting Carbon Steel — F. H. Sasse, 64 (Feb).

Patriot Missile, GTA Welders Put the Finishing Touches on the Fins for the — 71 (May).
PC-Based Expert Systems and their Applications to Welding — D. M. Barborak, D. W. Dickinson and R. B. Madigan, 29 (Jan).
Pinch Welding Uses Quantitative Feedback Theory — A. E. Bentley, 51 (June).
Piping Needs Contaminant-Free Welds — 63 (Nov).
Pipelines, Girth Weld Defects in Mechanized GMA Field-Welded — M. J. Wagner and B. M. Patchett, 75 (June).
Plasma: A New Contender in Metal Spraying, Wire Arc — D. R. Marantz and K. A. Kowals, 46 (Aug).
Plasma Arc Welding of Exhaust Pipe System Components — E. P. Vilkas, 49 (Apr).
Plasma Process Increases Quality in Cutting Carbon Steel, Oxygen — F. H. Sasse, 64 (Feb).
PQR Retrieval, Software Speeds WPS and — J. C. Evans, 67 (Jan).
Pressure Vessel Fabrication Makes a Comeback in the U.S. — B. Irving, 50 (Dec).
Productivity, Software Solutions Improve — M. Bernasek, 57 (Jan).
Promising Chrome-Moly Steel Returns to American Shores, A — B. Irving, 35 (Dec).
PVC-Coated Steel, Take Precautions When Cutting — 55 (Feb).

Qualification with Military Standard 248 Made Easy, Weld — E. P. Weber, 29 (Feb).
Quality in Cutting Carbon Steel, Oxygen Plasma Process Increases — F. H. Sasse, 64 (Feb).
Quality: It's One Tough Job, Controlling Weld — A. Cullison, B. Irving and M. R. Johnsen, 31 (June).
Quality of Critical Welded Components, Infrared Thermography Monitors — 59 (Dec).
Quantitative Feedback Theory, Control of Pinch Welding Uses — A. E. Bentley, 51 (June).

Radioscopy Offers Flexibility, Speed in Weld Inspection — F. J. Schlieper and M. Green, 61 (Mar).
Rail Transit Cars, Welding BART's — B. Keyser, 39 (Nov).
Real-Time Weld Quality Monitor Controls GMA Welding — R. Reilly, 36 (Mar).
Recent Research Activities at MIT on Residual Stresses and Distortion in Welded Structures — K. Masubuchi, 41 (Dec).
Record Number of Exhibitors Paces AWS Welding Show — A. Cullison and B. Irving, 27 (July).
Regulator Works with Control Unit for Better Tip Force Control — T. Isaacs, 85 (June).
Reliability, Computer Codes Improve — 69 (Apr).
Repair Welding: How to Set Up a Shop — C. M. MacCocaire, 54 (Aug).
Repairing Tungsten Filaments through Microwelding — E. Zumelzu and L. Buchner, 65 (July).
Residual Stresses and Distortion in Welded Structures, Recent Research Activities at MIT on — K. Masubuchi, 41 (Dec).
Resistance Spot Welds, A Comparison of Fatigue Strengths: Laser Beam vs. — P. -C. Wang and K. -M. Ewing, 43 (Oct).
Resistance Welding, Air Pressure Often Overlooked in — E. A. Green, 91 (June).
Rims Offers Advantages, Flashless DC Welding of — F. C. Kucklick, 61 (July).
Robotic Line Design, Software Slashes Time Required for — H. Beit-On, 63 (Jan).
Robotic System Setup, Simulation Heads Off Problems Prior to — 65 (Sept).
Robotic Welding: Mutual Compatibility, Safety and — V. L. Mangold, Jr., 71 (Sept).

Safety and Robotic Welding: Mutual Compatibility — V. L. Mangold, Jr., 71 (Sept).
Sculpture Reflects Competition Company's Talents, Anniversary — 69 (Jan).
Scrubbers, Challenge for the '90s: Welding Utility — B. Irving, 35 (May).
Select the Right Equipment for a Clean Welding Environment — T. J. Vidmar, 47 (Sept).
Selecting the Best Joint Design for Ultrasonic Welding of Thermoplastics — 67 (May).
Shipbuilding, Experiences with CIM in — J. Gustafsson

and M. Heinakari, 27 (Mar).
Simulation Heads Off Problems Prior to Robotic System Setup — 65 (Sept).
Software Beats Market Downturn, Steel Fabricating — 79 (Jan).
Software Slashes Time Required for Robotic Line Design — H. Beit-On, 63 (Jan).
Software Speeds Production, Cutting — 58 (Feb).
Software Speeds WPS and PQR Retrieval — J. C. Evans, 67 (Jan).
Software Solutions Improve Productivity — M. Bernasek, 57 (Jan).
Soldering of Electronic Components, How $1-Billion per Year Can Be Saved in the — B. Irving, 54 (Oct).
Soviet Style: A Front Runner for Space, Electron Beam Welding — B. Irving, 55 (July).
Space, Electron Beam Welding, Soviet Style: A Front Runner for — B. Irving, 55 (July).
Spreadsheet Software, Calculate Automation Payback with — K. Kuk and H. O. Neumann, Jr., 73 (Jan).
Stainless Steel Mechanized GTA Welds, Cast-to-Cast Variability in — J. A. Lambert, 41 (May).
Statistical Process Control for Welding — J. C. Papritan and S. C. Helzer, 44 (Mar).
Steel Fabricating Software Beats Market Downturn — 79 (Jan).
Steel Weldments, As-Welded Notch Impact Toughness Test for — C. Hahin, 47 (Feb).
Steels?, What Processes Can Be Used to Weld 65 ksi Yield — K. J. Rodgers and J. C. Lochhead, 29 (Dec).
Studs Removed by Welding, Broken — S. Elmer, 64 (Dec).
Summary of Computer Programs for Welding Engineering — H. B. Cary, 40 (Jan).
System Elevates High-Rise Floor Panel Production — 67 (July).

Take Precautions When Cutting PVC-Coated Steel — 55 (Feb).
Techniques for Training Entry-Level Welders — M. Miller, 79 (Apr).
Thermal Spray Coatings Are Most Cost Effective, Where — K. Kempton, 41 (Aug).
Thermoplastics, Selecting the Best Joint Design for Ultrasonic Welding of — 67 (May).
TIME Welding of HY80 Plate, An Evaluation of — J. R. Matthews, J. F. Porter, J. Church and M. Macecek, 35 (Feb).
Tip Force Control, Regulator Works with Control Unit for Better — T. Isaacs, 85 (June).
Titanium, Gas Tungsten Arc Welding: It's Built to Handle — 31 (Nov).
Training Entry-Level Welders, Techniques for — M. Miller, 79 (Apr).
Trusses Need Heavyweight Welding, Jumbo-Section — B. A. D'Silva, 75 (Apr).
Tube-to-Tube Welding, Boiler Manufacturer Automates — 73 (Nov).
Tungsten Filaments through Microwelding, Repairing — E. Zumelzu and L. Buchner, 65 (July).

Ultrasonic Weld Flash Inspection Saves Money, Improves Quality — 71 (Mar).
Ultrasonic Welding of Thermoplastics, Selecting the Best Joint Design for — 67 (May).
Ultrasonics Provides Wartime Barrier to Shifting Sands — 57 (Aug).
Understanding Aluminum Welding — W. Tuttle, 43 (Feb).
Understanding GTA Welding of 90/10 Copper-Nickel — S. H. Gutierrez, 76 (May).
Underwater Cutting Paces Topside Technology, Evolution of — T. Joos, 63 (Apr).
U. S. Steelmakers Plan More Weldable High-Strength Steels — B. Irving, 55 (Apr).
Using Computers for the Design of Welded Joints — C. L. Tsai, 47 (Jan).

Wallpapering: Another Growth Market for Welding Fabricators — B. Irving, 45 (July).
Wartime Barrier to Shifting Sands, Ultrasonics Provides — 57 (Aug).
Weld Qualification with Military Standard 248 Made Easy — E. P . Weber, 29 (Feb).
Weld Quality Helps Cadillac Win the Malcolm Baldrige Award — B. Irving, 57 (Mar).
Weld Quality Monitor Controls GMA Welding — R. Reilly, 36 (Mar).
Welding Engineering, Summary of Computer programs for — H. B. Cary, 40 (Jan).
Welding Fabricators, Wallpapering: Another Growth Market for — B. Irving, 45 (July).
Welding Myths Put to Rest — J. W. Western, 75 (Mar).
Welding Problems for Nondestructive Evaluation — D. W. Morgan, 30 (Aug).
Welding Provided the Solution, Even in Its Infancy — 88 (June).
Welding Technology in Eastern Europe — T. A. Siewert and J. M. Gerken, 49 (Mar).
Welding Utility Scrubbers, Challenge for the '90s: — B. Irving, 35 (May).
What Processes Can Be Used to Weld 65 ksi Yield Steels? — K. J. Rodgers and J. C. Lochhead, 29 (Dec).
What's Behind the Corrosion of Microalloy Steel Weldments? — R. D. Kane and J. P. Ribble, 56 (May).
Where Thermal Spray Coatings Are Most Cost Effective — K. Kempton, 41 (Aug).
Wire Arc Plasma: A New Contender in Metal Spraying — D. R. Marantz and K. A. Kowals, 46 (Aug).
Workshop Marks a Path for Welding Research — A. Cullison, 67 (Mar).
WPS and PQR Retrieval, Software Speeds — J. C. Evans, 67 (Jan).

Part 2 — WELDING RESEARCH SUPPLEMENT

SUBJECT INDEX

Alloy 625, The Welding and Solidification Metallurgy of — M. J. Cieslak, 49-s (Feb).
Alloyed Metal Powder, Submerged Arc Welding Ferritic Steels with — N. Bailey, 187-s (Aug).
Aluminum in Shielded Metal Arc C-Mn Steel Multipass Deposits, The Effect of — G. M. Evans, 32-s (Jan).
Aluminum-Lithium Alloys, Welding of Lightweight — T. S. Srivatsan and T. S. Sudarshan, 173-s (July).
Aluminum Weld Grain Refinement, Influence of Solidification Kinetics on — M. J. Dvornak, R. H. Frost and D. L. Olson, 271-s (Oct).
Analyses of Electrode Heat Transfer in Gas Metal Arc Welding — Y.-S. Kim, D. M. McEligot and T. W. Eagar, 20-s (Jan).
Analysis and Development of a Real-Time Control Methodology in Resistance Spot Welding — C. L. Tsai, W. L. Dai, D. W. Dickinson and J. C. Papritan, 339-s (Dec).
Analysis of Fatigue Crack Propagation Behavior in Fillet-Welded T-Joints — C. L. Tsai, D. S. Kim and J. C. Papritan, 150-s (June).
Analysis of Weld Metal Transfer in Shielded Metal Arc Welding — S. Brandi, C. Taniguchi and S. Liu, 261-s (Oct).
Arc Sensor for Gas Metal Arc Welding of Horizontal Fillets, A Study on an — J. -W. Kim and S. -J. Na, 216-s (Aug).

Boron During SMA Welding, The Transfer of Small Amounts of — J. H. Chen and S. B. Xue, 277-s (Oct).
Brazes, Wettability of Nickel Alloys by Boron-Containing — W. F. Gale and E. R. Wallach, 76-s (Mar).
Brazing Alloys, A Study of Some Cu-Mn-Sn — S. K. Chatterjee, Z. Mingxi and A. C. Chilton, 118-s (May).
Brazing Processes That Use Coatings and Interlayers, Modeling of — S. Liu, D. L. Olson, G. P. Martin and G. R. Edwards, 207-s (Aug).
Brazing, Study of Furnace Atmosphere for Vacuum-Inert Gas Partial-Pressure — A. Sakamoto, 311-s (Nov).

Carbon on Mechanical Properties and Microstructure of Weld Metal from a High-Strength SMA Electrode, Influence on — E. Surian, J. Trotti, R. Herrera and L. A. de Vedia, 133-s (June).
Carbon Steel, Study of Submerged Arc Welded Metal and Heat-Affected Zone Microstructures of a Plain — A. Joarder, 141-s (June).
Characterization of Pulsed Electron Beam Welding Parameters — D. D. Kautz, 100-s (Apr).
Chemical Behavior of Select Welding Fluxes, Fundamentals of the — A. Polar, J. E. Indacochea and M. Blander, 15-s (Jan).
Climatic Conditions on Diffusible Hydrogen Content in Weld Metal, Effect of — G. Dickehut and U. Hotz, 1-s (Jan).
C-Mn Steel Multipass Deposits, The Effect of Aluminum in Shielded Metal Arc — G. M. Evans, 32-s (Jan).
C-Mn Weld Metal, Microstructure and Mechanical Properties of Cu-Bearing Shielded Metal Arc — M. Es-Souni, P. A. Beaven and G. M. Evans, 80-s (Mar).
Cobalt Alloy, Weldability Characteristics of a New Corrosion- and Wear-Resistant — S. J. Matthews, P. Crook, L. H. Flasche and J. W. Tackett, 331-s (Dec).
Computer Modeling of Transverse Residual Stresses in Repair Welds — R. H. Leggatt, 299-s (Nov).
Control of the Plasma Arc Cutting Process by Using Intensity Measurements of Ejected Plasma, Real-Time — K.-M. Yun and S.-J. Na, 43-s (Feb).
Correlation of Joint Penetration with Electron Beam Current Distribution — G. K. Hicken, W. H. Giedt and A. E. Bentley, 69-s (Mar).
Cracking in Low Heat Input GMA Weld Overlays, Helium-Induced Weld — S. H. Goods and C. W. Karfs, 123-s (May).
Cu-Bearing Shielded Metal Arc C-Mn Weld Metal, Microstructure and Mechanical Properties of — M. Es-Souni, P. A. Beaven and G. M. Evans, 80-s (Mar).
Cu-Mn-Sn Brazing Alloys, A Study of Some — S. K. Chatterjee, Z. Mingxi and A. C. Chilton, 118-s (May).

Diffusible Hydrogen Content in Weld Metal, Effect of Climatic Conditions on — G. Dickehut and U. Hotz, 1-s (Jan).

Effect of Aluminum in Shielded Metal Arc C-Mn Steel Multipass Deposits, The — G. M. Evans, 32-s (Jan).
Effect of Climatic Conditions on Diffusible Hydrogen Content in Weld Metal — G. Dickehut and U. Hotz, 1-s (Jan).
Effect of Gas Shear Stress on Maragoni Flows in Arc Welding, The — R. T. C. Choo and J. Szekely, 223-s (Sept).
Effective Heat Input in Pulsed Current Gas Metal Arc Welding with Solid Wire Electrodes — M. R. Bosworth, 111-s (May).
Effects of Varying Subatmospheric Pressure on Stationary Plasma Welds — J. J. Chin and B. Rubinsky, 235-s (Sept).
Electrical Current Flow in the Gas Metal Arc, Technical Commentary: Observations Regarding — A. Lesnewich, 171-s (July).
Electrode Heat Transfer in Gas Metal Arc Welding, Analysis of — Y.-S. Kim, D. M. McEligot and T. W. Eagar, 20-s (Jan).
Electron Beam Current Distribution, Correlation of Joint Penetration with — G. K. Hicken, W. H. Giedt and A. E. Bentley, 69-s (Mar).
Electron Beam Welding Parameters, A Characterization of Pulsed — 100-s (Apr).
Energy Deposition during Pulsed Laser Welding, Measurement of — D. A. Creamers, G. K. Lewis and D. R. Korzekwa, 159-s (July).
Evidence from Inclusion Chemistry of Element Transfer during Submerged Arc Welding — M. L. E. Davis and N. Bailey, 57-s (Feb).
Exhaust Valves, Laser Beam Cladding of Seating Surfaces on — W. Aihua, T. Zengyi and Z. Beidi, 106-s (Apr).

Fatigue Crack Propagation Behavior in Fillet-Welded T-Joints, Analysis of — C. L. Tsai, D. S. Kim and J. C. Papritan, 150-s (June).
Fillet-Welded T-Joints, Analysis of Fatigue Crack Propagation Behavior in — C. L. Tsai, D. S. Kim and J. C. Papritan, 150-s (June).

Fluxes, Fundamentals of the Chemical Behavior of Select Welding — A. Polar, J. E. Indacochea and M. Blander, 15-s (Jan).
Friction Welding: A Technical Note, Interface Properties in — S. D. Bhole, 168-s (July).
Fundamentals of the Chemical Behavior of Select Welding Fluxes — A. Polar, J. E. Indacochea and M. Blander, 15-s (Jan).
Furnace Atmosphere for Vacuum-Inert Gas Partial-Pressure Brazing — A. Sakamoto, 311-s (Nov).

Gas Metal Arc, Technical Commentary: Observations Regarding Electrical Current Flow in the — A. Lesnewich, 171-s (July).
Gas Metal Arc Welding, Analyses of Electrode Heat Transfer in — Y.-S. Kim, D. M. McEligot and T. W. Eagar, 20-s (Jan).
Gas Metal Arc Welding of Horizontal Fillets, A Study on an Arc Sensor for — J. -W. Kim and S. -J. Na, 216-s (Aug).
Gas Metal Arc Welding with Solid Wire Electrodes, Effective Heat Input in Pulsed Current — M. R. Bosworth, 111-s (May).
Gas Shear Stress on Maragoni Flows in Arc Welding, The Effect of — R. T. C. Choo and J. Szekely, 223-s (Sept).
Gas Tungsten Arc Welding, A Study of Melting Efficiency in Plasma Arc and — P. W. Fuerschbach and G. A. Knorovsky, 287-s (Nov).
Gas Tungsten Arc Welds, Prediction and Measurement of Residual Elastic Strain Distributions in — K. W. Mahin, W. Winters, T. M. Holden, R. R. Hosbons and S. R. MacEwen, 245-s (Sept).
GMA Weld Overlays, Helium-Induced Weld Cracking in Low Heat Input — S. H. Goods and C. W. Karfs, 123-s (May).
GMAW: Sensing of Metal Transfer Mode, Process Control of — J. A. Johnson, N. M. Carlson, H. B. Smartt and D. E. Clark, 91-s (Apr).

HAZ Microstructure and Toughness in HSLA Steels, A Study Concerning Intercritical — D. P. Fairchild, N. V. Bangaru, J. Y. Koo, P. L. Harrison and A. Ozekcin, 321-s (Dec).
Heat Input in Pulsed Current Gas Metal Arc Welding with Solid Wire Electrodes — M. R. Bosworth, 111-s (May).
Helium-Induced Weld Cracking in Low Heat Input GMA Weld Overlays — S. H. Goods and C. W. Karfs, 123-s (May).
HSLA Steels, A Study Concerning Intercritical HAZ Microstructure and Toughness in — D. P. Fairchild, N. V. Bangaru, J. Y. Koo, P. L. Harrison and A. Ozekcin, 321-s (Dec).

Inclusion Chemistry of Element Transfer during Submerged Arc Welding, Evidence from — M. L. E. Davis and N. Bailey, 57-s (Feb).
Influence of Carbon on Mechanical Properties and Microstructure of Weld Metal from a High-Strength SMA Electrode — E. Surian, J. Trotti, R. Herrera and L. A. de Vedia, 133-s (June).
Influence of Solidification Kinetics on Aluminum Weld Grain Refinement, M. J. Dvornak, R. H. Frost and D. L. Olson, 271-s (Oct).
Intercritical Annealed Dual-Phase Steel with the Resistance Spot Welding Process — P. K. Ghosh, P. C. Gupta, Ramavtar and B. K. Jha, 7-s (Jan).
Interface Properties in Friction Welding: A Technical Note — S. D. Bhole, (July).
Joint Penetraton with Electron Beam Current Distribution, Correlation of — G. K. Hicken, W. H. Giedt and A. E. Bentley, 69-s (Mar).

Laser Beam Cladding of Seating Surfaces on Exhaust Valves — W. Aihua, T. Zengyi and Z. Beidi, 106-s (Apr).

Maragoni Flows in Arc Welding, The Effect of Gas Shear Stress on — R. T. C. Choo and J. Szekely, 223-s (Sept).
Mechanical Properties and Microstructure of Weld Metal from a High-Strength SMA Electrode, Influence of Carbon on — E. Surian, J. Trotti, R. Herrera and L. A. de Vedia, 133-s (June).
Measurement of Energy Deposition during Pulsed Laser Welding — D. A. Cremers, G. K. Lewis and D. R. Korzekwa, 159-s (July).
Mechanical Properties of Cu-Bearing Shielded Metal Arc C-Mn Weld Metal, Microstructure and — M. Es-Souni, P. A. Beaven and G. M. Evans, 80-s (Mar).
Melting Efficiency in Plasma Arc and Gas Tungsten Arc Welding — P. W. Fuerschbach and G. A. Knorovsky, 287-s (Nov).
Metal Transfer in Shielded Metal Arc Welding, Analysis of — S. Brandi, C. Taniguchi and S. Liu, 261-s (Oct).
Metal Transfer Mode, Process Control of GMAW: Sensing of — J. A. Johnson, N. M. Carlson, H. B. Smartt and D. E. Clark, 91-s (Apr).
Microstructure and Mechanical Properties of Cu-Bearing Shielded Metal Arc C-Mn Weld Metal — M. Es-Souni, P. A. Beaven and G. M. Evans, 80-s (Mar).
Microstructure of Weld Metal from a High-Strength SMA Electrode, Influence of Carbon on Mechanical Properties and — E. Surian, J. Trotti, R. Herrera and L. A. de Vedia, 133-s (June).
Microstructures of a Plain Carbon Steel, Study of Submerged Arc Welded Metal and Heat-Affected Zone — A. Joarder, 141-s (June).
Modeling of Brazing Processes That Use Coatings and Interlayers — S. Liu, D. L. Olson, G. P. Martin and G. R. Edwards, 207-s (Aug).

Nickel Alloys by Boron-Containing Brazes, Wettability of — W. F. Gale and E. R. Wallach, 76-s (Mar).

Plasma Arc and Gas Tungsten Arc Welding, A Study of Melting Efficiency in — P. W. Fuerschbach and G. A. Knorovsky, 287-s (Nov).
Plasma Arc Cutting Process by Using Intensity Measurements of Ejected Plasma, Real-Time Control of the — K.-M. Yun and S.-J. Na, 43-s (Feb).
Plasma Welds, Effects of Varying Subatmospheric Pressure on Stationary — 235-s (Sept).
Prediction and Measurement of Residual Elastic Strain Distributions in Gas Tungsten Arc Welds — K. W. Mahin, W. Winters, T. M. Holden, R. R. Hosbons and S. R. MacEwen, 245-s (Sept).
